

Dear Valued Customer,

As partners in scientific research, we want you to know that our continued focus is to provide the best products and solutions to meet your needs.

BD is committed to delivering exceptional customer experience, making it easier for you to do business with us. To that end, we routinely streamline our product offerings and optimize our supply chain to drive greater efficiency. Through these initiatives, our intent is to improve demand planning, consistency of supply, and lead times for you.

We aim to keep you well informed about upcoming discontinuations tied to these simplification efforts and have, to that end, attached a list of affected products that have been purchased by your organization in the past 18 months. Also listed are suggested alternate products, where applicable. Your local applications specialist may also be able to support with identifying other alternate products across our Research Reagents portfolio to meet your needs.

Preview list of affected products purchased in SEA in the last 3 years:

Discontinuing Material ID	Discontinuing Material Description	Suggested Alternate Material Number	Suggested Alternate Material Description
