

Recombinant C92-605.rMAb will replace C93-605

Dear Valued Customer,

BD continually strives to deliver quality products, improve our offerings to better serve our customers and help optimize multicolor flow experiments. To this extent, we are pleased to inform you that BD has developed a recombinant C92-605 clone against Caspase-3, named C92-605.rMAb.

With the introduction of the new recombinant C92-605.rMAb, we will be transitioning away from C92-605. For our customers, while the specificity remains unchanged, the clone and catalog number will be updated. A list of affected products, recommended alternatives and timelines are provided below. We aim to provide you with a transition period of at least six (6) months for comparison testing and study completion. Representative data for C92-605.rMAb will be provided on the Technical Data Sheet (TDS) or upon request.

For assistance during this transition period, please reach out to your local sales representative or drop email BD Biosciences at bdb.sea.marketing@bd.com.
